

Lighting at Medomak Valley High School:

We have an ETC Element 60 console.

We have lighting positions from our catwalk and over the stage.

Our rep plot is broken into 12 separate areas, 5 downstage, 4 middle, and 3 upstage. Our front and middle areas are shuttered roughly to the bottom of the cyc, whereas the back 3 areas will reflect slightly onto the cyc. If you stay in front of our black traveler (roughly 4 feet in front of the cyc) the forward and middle areas should be sufficient.

Our rep plot is made up of ETC Source 4 JR Zoom instruments gelled Rosco 54 Special Lavender.

We have LED down lighting provided by ETC Color Source PAR DBs. There is one instrument per each area 1 – 9.

Our cyc lighting is provided by 6 ETC Color Source CYC fixtures that can be addressed individually or as a group.

We have 42 circuits split between the catwalk and the stage. All of our circuits have 20A twist lock-type plugs. If you plan on bringing specials a heads-up before Tech Saturday would be appreciated so we can make sure we have the circuits available where you need them.

Our facility does present some challenges due to its lack of height and two beams that run through the catwalk slot and over the stage. It takes some creativity at times to work around these limitations, and we will do everything we can to meet your requirements.
