

## **Student Assessment**

An “assessment system” is a coordinated collection of assessments administered to students that, as a whole, provides information on individual students, the school, and RSU 40 with respect to student achievement of the content standards of the system of Learning Results.

The purpose of the assessment system is to provide information that will be used to monitor student progress and meet the needs of individual students, inform instruction and curriculum, enable school administrators to make informed determinations regarding the quality and effectiveness of the educational program and the need for professional development, provide the State with student achievement data, inform parents of student progress, and enable the Board to make informed decisions related to allocation of resources.

The Superintendent/designee is responsible for implementing RSU 40’s assessment system and for ensuring that the assessment system is in compliance with applicable statutes and Maine Department of Education rules. The Board expects that there will be input from teachers and administrators in the development and refinement of the assessment system.
