Executive Summary

In the fall of 2015, a survey was conducted to solicit input from parents, students and staff members throughout the district to learn the values and priorities community members want to see in their school system. After the Administrative Team and the Board of Directors reviewed the survey results, a Comprehensive Education Planning Team was developed to guide the work set forth in this document. This team included representatives from different stakeholder groups in the towns served by Regional School Unit 40: students, parents, staff, administration and community members.

The Team began its work in April 2016 by reviewing the data from the community survey, existing district guiding documents and Maine regulations which outline the expectations for school approval (Chapter 125). From that review, the team identified the broad areas of work to be addressed in the comprehensive plan: Student Learning, Personnel Development and Support, and Facilities and Finances. Team members served as co-chairs of each of the committees which met on a regular basis from June 2016 through April 2017. Each committee shared its work with the Comprehensive Education Planning Team at their monthly meetings and solicited feedback from other stakeholders throughout the process.

The results of the community survey formed the basis for the clarification of the vision, mission and values. An extensive review of existing programs by the respective committees served to define the objectives and strategies for each of the goal areas; unless otherwise noted, references in the text (e.g., Section 2.04) are to Chapter 125 Basic Approval Standards: Public Schools and School Administrative Units.
